Only one process runs at a time
System requirements: 1 GHz processor 1 GB RAM 2 GB space
Windows Vista or

higher 2.3 MB space (disk space) DiskChart Reviews (14) Average rating: (5 of 14 votes) Love It! Excellent application if you are on a budget or a netbook, the only drawback is that the application doesnt have a CD-key version. Better than disk space calculator, Gparted Dec 31st, 2010 2 of 3 people found this helpful DiskChart Review: Good The only application that gives a true visual representation of disk space utilization. Why this reviewer rated it useful A little

more work to setup and a little more work to print off the info, but overall it is worth it. Great application! Jan 1st, 2010 3 of 5 people found this helpful DiskChart Review: Great Having to open several windows to get the desired information to come up can be annoying, especially if you're running this on a tablet. This would be great for a tablet PC because you wouldn't have to launch other programs to get your information. Best of the Best! Dec 13th, 2008 5 of 6 people found this helpful

DiskChart Review: Best of the Best! This is the only application I've seen that can actually give you a visual representation of your disk space. DiskChart manages to take your 1,024 GB disk and visualize it in a fun way. The best Oct 12th, 2008 2 of 5 people found this helpful

DiskChart Review: The best I could not even think of an application that could be better in representing the data of your disk than DiskChart. It has that kind of simplicity that is hard to match and is the

best.2015–16 Eredivisie The 2015–16 Erediv

Keymacro, the most convenient macro recording and execution program, is a powerful tool to record, run and reverse macros for Windows. Keymacro support: Record, run and reverse all kinds of Windows Macro commands can be recorded and run via hotkeys, shortcuts, single mouse clicks or combinations of keystrokes

Copy, paste, cut, format, synchronize, convert and email. It is a simple and easy to use program. Keymacro is simple to use. Simply record and play macros, or have it do everything for you. Keymacro also supports copying, pasting, cutting and formatting via mouse clicks or combinations of keys. Record macros with the mouse, keyboard or hotkeys. Windows, VCD, JPEG2000, ASF, XVID or AVI. Automatic conversion to multiple formats including playing back. Create your own

hotkeys and shortcuts for more productivity. More than 100 hotkeys and keyboard shortcuts, with more added every week. Efficient clipboard management for efficient multiple pasting. Mail a record of your macro to yourself or anyone else via email, CD, USB, or network drives. Export the current and recent recordings to EXE, DLL, HTA, EXE or PDF files. Save time by checking if a macro will work and creating one or more non-functional copies instead of

recording one. Keymacro also lets you assign hotkeys and keyboard shortcuts for existing Windows commands, or even your own commands. IsKeywrokr is a useful way to record your own keyboard macros. With IsKeywrokr, you can record and play macros from the keyboard. You can also use hotkeys to record a macro and play it, even from the keyboard. Hotkeys allow you to avoid the use of the mouse, and the release of the CAPS LOCK key. IsKeywrokr will make a

copy of the current window active on the system, so that you can play or record the macro while you are working with the program. IsKeywrokr will create a backup copy of the original file, just in case the original gets deleted.

IsKeywrokr will import a Macro recording from a text file or text editor. * Record macros via keyboard and mouse buttons, for example, the Windows CAPS LOCK key, F10-F12, and so on. *

Store your recorded macros in an easy to use text file
